Task: Complete HTML Project

To Learn: Combine the most useful HTML tags into one complete project.

Task description: Study the following tags and attributes. Practice each one in a small HTML file.

- <link> — external resource link.
- <style> — embedded style block.
- <base> — base URL.
- <script> — script element.
- <noscript> — fallback.
- <form> and common controls — complete forms.
- <details> and <summary> — expandable content.
- <dialog> — dialog.
- <template> — reusable markup.
- <iframe> — embedded content.
- <object> and <embed> — embedded resources.
- <picture>, <source>, <track> — media sources.
- <data> — machine-readable value.
- <dfn> — defining term.
- <var> — variable.
- <ruby>, <rt>, <rp> — pronunciation annotation.
- <wbr> — optional word break.
- <hr> and common text tags — content structure.
- Global attributes: id, class, title, lang, dir, hidden, tabindex, contenteditable, draggable, spellcheck, translate, data-*.
